

The Furniture Group has worked with several GP practices to develop an efficient health information display system.

In contrast to the usual clutter of leaflets and posters found at most GP practices, this system helps to streamline the display of leaflets and posters. The result is that public health messages are delivered more effectively to patients. Waiting areas are also kept clean and tidy.

The signage system comprises of a variety of A5, A4, A3, A2 and A1 acrylic pockets, with a series of A5 and third A4 leaflet dispensers. For more information, click here: www.furnituregroupuk.com or call us on 020 8709 9733.

1. Wall mounted track system displaying a variety of different sized posters.
2. Leaflet dispensers can hold any size leaflets.
3. Acrylic pockets mean that posters are easily changed.
4. The signage system creates a clean, modern environment for the surgery entrance.
5. Patients can easily access health information.
